## SKILLS

---

- Typescript, C++, AWS, Flask, SQL, Git
- Angular, NestJS, NextJS, React Native, Express, Firebase

## WORK EXPERIENCE

---

### Full Stack Engineering Intern @Codinova Tech

Sep 2023 - Nov 2023

- Worked on creating a customer support endpoint leveraging MS Graph API, lambda functions and email integration
- Worked on Restful API for admin showing user analytics like number of active users, total users
- Integrated API with Admin Dashboard created with Angular
- Worked with Angular, NestJS, Typescript, MongoDB, Gitlab, Postman

### Full Stack Developer Intern @Kogniti

Mar 2023 - Apr 2023

- Worked on creating responsive React components using Material UI, and integrated with the backend system
- Created REST API endpoints along with authorization, and authentication with expressJS and MongoDB

## PROJECTS

---

### The Happy Store

[Link](#)

- Android application created with Typescript, React Native, Expo, NestJS
- Backend built using NestJS, MongoDB, Typescript and hosted on render.com
- Payment integration using razorpay gateway
- Authentication is OTP-based using fast2sms service

### Spotify Playlist Generator

[Link](#)

- Desktop application created with ElectronJS, ReactJS, and ExpressJS
- Creates an online playlist of your offline songs, present on your device without manually entering them one by one
- Uses OAuth for authentication and requires permission to read and modify your playlists

### Booklists

[Link](#)

- Blog site created to write about all the books that I will read this year.
- Built with Python, Flask, SQLite

### BikeChain

[Link](#)

- Decentralised bike rental system
- Smart Contract hosted on Goerli Test network, frontend application created with React

## EDUCATION

---
